8. The Commission has received information from the Ministry of Health regarding the implementation of the National Health Insurance Scheme (NHIS) for the year 2015. It is noted that the NHIS has been successfully implemented for the first time, covering all citizens and providing access to essential health services. The Commission commends the Government for its commitment to universal health coverage.

9. However, it is also noted that there are challenges in ensuring the sustainability of the NHIS, particularly in terms of funding and service quality. The Commission recommends that the Government should continue to monitor the performance of the NHIS and take measures to address any issues that may arise.
