
■■■■■■■■■■:New in the market! A truly unique estate in the Natural Park of the Strait.

There are properties... and then there are those that rarely come to market.

Set in the heart of the Natural Park of the Strait, this estate of over 5 hectares offers something increasingly rare: complete privacy within a protected environment where no further development will ever be permitted.

A unique setting where nature and the sea meet, with the added privilege of being able to walk to both the beach and the town of Tarifa.

The property includes a traditional cortijo of 260 sqm already in place, providing an excellent foundation for a full renovation and the creation of a truly exceptional project. It also features stables and a swimming pool, offering significant potential for both residential use and investment.

A place for those who appreciate authenticity, rarity, and what simply cannot be replicated.

There is truly nothing comparable within the entire municipality.
